Objective of this report	3
Background	3
Terms of Reference	4
Approach	5
Data Element Guidelines	5
Supply of trained and educated workforce	6
Data Element 1: Identify sources and compile available data on general education	7
Data Element 2: Data TVET and Skills training providers	18
Data Element 3: Formal Apprentices Enrolments and Graduations and Trade wise	29
Data Element 4: Identify sources and compile available data on employability of the recent Graduates from different programmes, occupational qualification and trade-wise	31
Data Element 5: Annual supply of skilled and educated workforce due to massive retrenchments, company closure, etc., trade wise	32
Data Element 6: Annual arrival of skilled and educated workforce returning from overseas, trade-wise	34
Data Element 7: Number of employees due to unemployment and underemployment	35
Demand for trained and educated workforce	37
Data Element 1: Identify sources and data standards used to classify occupational and qualification structures of economic sectors (organised and, if possible, unorganised economies) at the national and state levels	38
Data Element 2a: List available data on the occupational and qualification structures of economic sectors in organised economies at the national and state and district levels.....	40
Data Element 2b: List available data on the occupational and qualification structures of economic sectors in unorganised economies at the national and state and district levels.....	43
Data Element 3: Identify sources and list available occupational data on the annual demand for semi-skilled, skilled and high-skilled workers, and technicians for overseas employment (ie: labour outflow);.....	44
Data Element 4: Identify sources and provide samples of data on the annual local demand for skilled and semi-skilled workers and technicians.....	46
Data Element 5: Emerging new investments and company registrations	47
Data Element 6: Identify other sources and produce samples of other data used to forecast the demand for skills in different economic sectors	55
Observations	62
Key issues in supply and demand	63
Key interventions	Error! Bookmark not defined.

Objective of this report

The purpose of this document is to review the sources of skills and TVET data and assess the availability of specific data sets relevant to future efforts to better understand the supply and demand of skills in India.

Background

The primary goal of the ILO is to achieve full and productive employment and decent work for all, including women and young people, a goal that has now been widely adopted by the international community. Working towards this goal is the fundamental aim of the ILO.

Quality data is crucial for the effective management and planning of TVET and skills training systems, which involves the full range of skill development activities undertaken by both public and private training providers. In addition to data for institutional accountability systems, key labour market and program measures are required to ensure that the supply of skills better matches the demand from industry. Such arrangements are not currently in place in India.

The ILO recognizes that the planning of pre-employment education and training should align with future employment opportunities and deliver competencies that meet the expectations of prospective employers.

In order to improve the capacity of the skills development system in India to meet the demands of the labour market, the ILO is working with various key data stakeholders to strengthen the national skills development system so it can provide timely and accurate information to industry and program planners and managers in both the public and private sector.

This report was prepared by ICRA Management Consulting Services Limited (IMaCS) Consulting to provide an overview and examples of key data sets currently available in India.

Key Data Sets

The key data sets related to the supply and demand for skills considered in this report are shown below.

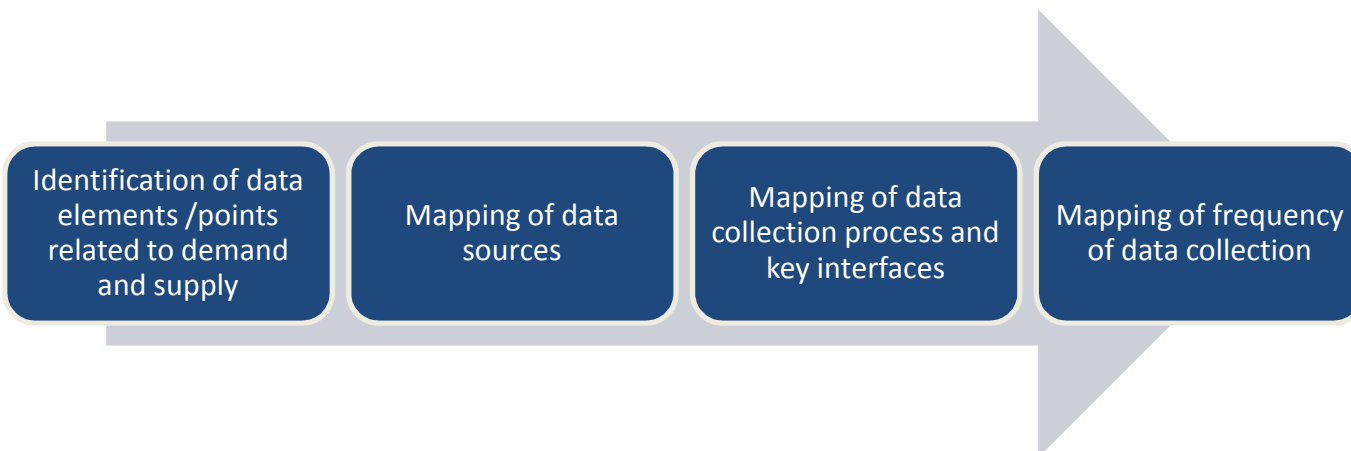

(A) Relating to the supply of the trained and educated workers:

1. Number of youth in different age groups;
 - Enrolments in general education, progression and graduation rates;
 - Graduations from the primary and secondary school and dropouts and their shares enrolled in further education including TVET and skills training establishments (public and private institutions including NGOs, ITIs, polytechnics, etc.);
2. TVET and skills training providers (public and private institutions, schools, NGOs and others) including their numbers, location, average annual enrolments and graduates, types and duration of courses trade-wise, and learning outcome-wise;
3. Formal apprentices enrolments and graduations per year, trade-wise;
4. Employability of the recent graduates from different programmes, occupational qualification-and trade-wise;
5. Annual supply of skilled and educated workforce due to massive retrenchments, company closures, etc., trade-wise;
6. Annual arrival of the skilled and educated workforce returning from overseas, trade-wise
7. Rates of unemployment and underemployment of the educated and trained persons, trade-wise where it exists;

(B) Relating to the demand for trained and educated workers:

1. Occupational and qualification structures of economic sectors (organised and, if possible, unorganised economies) at the national and state levels;
2. Occupational and qualification structures of economic sectors (organised and, if possible, unorganised economies) at the national and state and district levels;
3. Occupational data on the annual demand for semi-skilled, skilled and high-skilled workers, and technicians for overseas employment (ie: labour outflow);
4. Annual local demand for skilled and semi-skilled workers and technicians due to:
 - Demographic replacement needs (due to sickness, death, retirements, etc.);
 - Labour turnover when exiting skilled workers are changing their occupational profiles through skills retraining to accept different jobs;
5. Average demand for skilled and educated workforce for the new jobs created annually (emerging from new investments, company registrations, etc.) in both the organised and unorganised economies;
6. Other data used to forecast the demand for skills in different economic sectors.

Approach

Data Element Guidelines

The findings for each data element are laid out in the following generic format. The meaning of each of the procedure sub headings are specified below.

Title:								
Source:	Period:	Frequency:						
Data available:		Data availability level:						
		<table border="1"> <tr> <td>National Level</td> <td></td> </tr> <tr> <td>State Level</td> <td></td> </tr> <tr> <td>District Level</td> <td></td> </tr> </table>	National Level		State Level		District Level	
National Level								
State Level								
District Level								
Data gap								

- **Title:**The title of the data element
- **Source:**The source of data element
- **Period:** Indicates the year/period of data element
- **Frequency:** The frequency with which the element's execution should be repeated.
- **Data Available:** A short description of the data element
- **Data Availability Level:** Indicates the data availability level: National or State or District
- **Data gap:** Broadly outlines the gap between required and available data
- **Sample Data Template:** A sample copy of the format in which data is available

Part 1: Supply of trained and educated workforce

As part of this module, we have mapped the data sources pertaining to supply side covering:-

1. Identify sources and compile available data on general education, including:
 - a. Number of youth in different age groups;
 - b. Enrolments in general education, progression and graduation rates;
 - c. Graduations from the primary and secondary school and dropouts and their shares enrolled in further education including TVET and skills training establishments (public and private institutions including NGOs, ITIs, polytechnics, etc.);
2. Identify sources and compile available data on TVET and skills training providers (public and private institutions, schools, NGOs and others) including their numbers, location, average annual enrolments and graduates, types and duration of courses trade-wise, and learning outcome-wise;
3. Identify sources and compile available data on formal apprentices enrolments and graduations per year, trade-wise;
4. Identify sources and compile available data on the employability of the recent graduates from different programmes, occupational qualification-and trade-wise;
5. Identify sources and compile available data on the annual supply of skilled and educated workforce due to massive retrenchments, company closures, etc., trade-wise;
6. Identify sources and compile available data on the annual arrival of the skilled and educated workforce returning from overseas, trade-wise
7. Identify sources and compile available data on the rates of unemployment and underemployment of the educated and trained persons, trade-wise where it exists;
8. Evaluate the availability, regularity and reliability of sources for the above and identify gaps where they exist.

Data Element 1: Identify sources and compile available data on general education

Data element 1 covers the following three sub-elements:

- a. Number of youth in different age groups;
- b. Enrolments in general education, progression and graduation rates;
- c. Graduations from the primary and secondary school and dropouts and their shares enrolled in further education including TVET and skills training establishments (public and private institutions including NGOs, ITIs, polytechnics, etc.);

Data Element 1a: Number of youth in different age groups

Title 1:Age Groups

Data Element 1C: Graduations from primary and secondary schools and dropouts and their shares enrolled in further education including TVET and skills training establishments

This section has been divided into the following sub sections:

1. Number of schools
2. Primary and secondary School
 - Enrolments
 - Dropouts

1. **Number of schools:** There are around 1.3 million schools in India

Title 1a: Statistics of School Education								
Source: Ministry of Human Resource Development Department of Higher Education	Period: 2009-10	Frequency: Yearly						
Data available: <ol style="list-style-type: none"> 1. School education institutes 2. Institutions by management 		Data availability level: <table border="1"> <tr> <td>National Level</td> <td>√</td> </tr> <tr> <td>State Level</td> <td>√</td> </tr> <tr> <td>District Level</td> <td></td> </tr> </table>	National Level	√	State Level	√	District Level	
National Level	√							
State Level	√							
District Level								

Data Gap:

1. Tracking system of dropouts does not exist.
2. Details of dropouts enrolling for TVET and other skill training are not available.
3. There is no system for reconciling dropout against the total TVET enrolment, due to lack of individual tracking system. The system of UID would address this problem in future.

2. Retrenchment and closure of industries (Source Labour Bureau)

Item	2009 January-July			2010 January-July			2011 January-July		
	Central	State	Total	Central	State	Total	Central	State	Total
Industrial unit affected by									
Retrenchment	4	17	21	4	7	11	4	-	4
Closure	-	48	38	-	34	34	-	32	32
Workers affected									
Retrenchment	1374	963	2337	432	117	549	4		4
Closure		1782	1782		1217	1217		1435	1435

Company closure

The supply of skilled and educated workforce can happen due to the closure of private companies or due to public sector enterprises being declared as 'sick'.

A company/enterprise is called a 'sick' unit and is closed down when it is unable to financially sustain and has been designated as such by the government.

Title: List of Sick Companies	
Source: Board Industrial & Financial Reconstruction (BIFR)	Period: 1. 1994-05 2. 2004-05
Data available: Select list of sick companies	Frequency: Updated on ad-hoc basis
	Data availability level:
	National Level ✓
	State Level ✓
	District Level ✓

Data Gap:

Limited data available on the sick companies however, data on the workforce is not available

Sample data template

BIFR gives a list of sick companies that have appeared before the board for financial reconstruction.

Case Number	Company Name	Address	Status	Date of last Order
161/2002	S & S POWER SWITCHGEAR Ltd.	111, MOUNT POONAMALLEE ROD PORUR, CHENNAI-600 116	Dismissed as Non Maintainable	02/09/2003
58/2007	Kool Breweries Ltd.	A-61, Okhla Industrial Area, Phase-II, New Delhi-1	Declared Sick / DRS Awaited	06/07/2010

Data Element 6: Annual arrival of skilled and educated workforce returning from overseas, trade-wise

Title: Estimated number of Overseas Indians			
Source: ▪ Ministry of Overseas Indian Affairs		Period: ▪ 2009	
		Frequency: NA	
Data available: Number of Indians living overseas		Data availability level:	
		National Level	√
		State Level	NA
		District Level	NA
Data Gap			
1. Lack of consolidated view of skilled and educated workforce returning from overseas and trade wise			
2. Lack of occupation wise skilled information			
However the same can be reconciled with Ministry of External Affairs data based on various visa types.			

Sample data template

1. Number of Indians living overseas

Country	Overseas Indians	NRI	PIO
Argentina	1400	300	1100

Brazil	1000	200	800
Russia	14200	14063	137

Data Element 7: Number of employees due to unemployment and underemployment

Unemployment

Title: 1. Key Indicators of Employment and Unemployment in India 2. Community-wise break up of job seekers waiting on the roles of employment exchange in Tamil Nadu as on 30.6.11

Underemployment

Definition of underemployment

Underemployment is defined as a stage when a situation in which a worker is employed, but not in the desired capacity, whether in terms of compensation, hours, or level of skill and experience. While not technically unemployed, the underemployed are often competing for available jobs.

Data for underemployment is not available in the public domain.

Demand for trained and educated workforce

In this section, we have mapped the following data elements relevant to assessing the demand for skills:

1. occupational and qualification structures of economic sectors (organised and, if possible, unorganised economies) at the national and state levels;
2. occupational and qualification structures of economic sectors (organised and, if possible, unorganised economies) at the national and state and district levels;
3. occupational data on the annual demand for semi-skilled, skilled and high-skilled workers, and technicians for overseas employment (ie: labour outflow);
4. annual local demand for skilled and semi-skilled workers and technicians due to:
 - Demographic replacement needs (due to sickness, death, retirements, etc.);
 - Labour turnover when exiting skilled workers are changing their occupational profiles through skills retraining to accept different jobs;
5. average demand for skilled and educated workforce for the new jobs created annually (emerging from new investments, company registrations, etc.) in both the organised and unorganised economies;
6. other data used to forecast the demand for skills in different economic sectors.

Data Element 1: Identify sources and data standards used to classify occupational and qualification structures of economic sectors (organised and, if possible, unorganised economies) at the national and state levels

1. *National Occupational Classification*

Title: Data standards used to classify occupational and qualification structures of economic sectors								
Source: DGET	Period: 2004	Frequency: Not Available						
Data available: <ul style="list-style-type: none"> ▪ Occupational Divisions (9 Divisions) ▪ Occupational Groups (95 Groups) ▪ Occupational Families (462 families) ▪ Occupations (2484 Occupations) 		Data availability level: <table border="1"> <tr> <td>National Level</td> <td>√</td> </tr> <tr> <td>State Level</td> <td>NA</td> </tr> <tr> <td>District Level</td> <td>NA</td> </tr> </table>	National Level	√	State Level	NA	District Level	NA
National Level	√							
State Level	NA							
District Level	NA							
Data Gap: Inadequate information regarding qualification structure of economic sectors								

Sample data template

1. *Divisions*

#	Divisions
1	LEGISLATORS, SENIOR OFFICIALS AND MANAGERS
2	PROFESSIONALS
3	TECHNICIANS AND ASSOCIATE PROFESSIONALS
4	CLERKS
5	SERVICE WORKERS AND SHOP & MARKET SALES WORKERS
6	SKILLED AGRICULTURAL AND FISHERY WORKERS
7	CRAFT AND RELATED TRADES WORKERS
8	PLANT AND MACHINE OPERATORS AND ASSEMBLERS
9	ELEMENTARY OCCUPATIONS

2. *Subdivisions*

Division	LEGISLATORS, SENIOR OFFICIALS AND MANAGERS
Sub-division	11 Legislators and Senior Officials
	12 Corporate Managers
	13 General Managers

2. *National Industrial Classification*

The National Industrial Classification (NIC) is a standard for developing and maintaining comparable data base based on economic activities. This would help in classifying the economically active population, industrial production and distribution, labour statistics and other economic data such as national income.

Title: National Industrial Classification			
Source: Central Statistical Organisation	Period: 2008	Frequency: Not Available	
Data available: 1. NIC-2008 has 21 sections, 88 divisions, 238 groups, 403 classes and 1304 sub-classes pertaining to various economic activities		Data availability level:	
		National Level	√
		State Level	NA
		District Level	NA

Sample data template

1. *Broad Structure*

Section A Agriculture, forestry and fishing
Division 1 Crop and animal production, hunting and related service activities
Group 011 Growing of non-perennial crops
Group 012 Growing of perennial crops
Group 013 Plant propagation
Group 014 Animal production
Group 015 Mixed farming
Group 016 Support activities to agriculture and post-harvest crop activities
Group 017 Hunting, trapping and related service activities

2. *Division 01: Crop and animal production, hunting and related service activities*

Growing of non-perennial crops
This class includes all forms of growing of cereals, leguminous crops and oil seeds in open fields, including those considered organic farming and the growing of genetically modified crops. The growing of these crops is often combined within agricultural units
01111 Growing of wheat
01112 Growing of jowar, bajra and millets
01113 Growing of other cereals
01114 Growing of pulses (dal) and other leguminous crops such as peas and beans, not used as oilseeds
01115 Growing of mustard oil seed
01116 Growing of groundnut oil seed

Growing of non-perennial crops
01117 Growing of sunflower oil seed
01118 Growing of soya bean oil seed
01119 Growing of other oil seeds

Data Element 2a: List available data on the occupational and qualification structures of economic sectors in organised economies at the national and state and district levels

Title:

Data Element 4: Identify sources and provide samples of data on the annual local demand for skilled and semi-skilled workers and technicians

Demographic Replacement due to death

As per the Central Bureau of Health Intelligence, it is estimated that 9 million deaths occur in India every year. Of which only 48 percent of deaths are registered.

Title: Mortality Statistics in India			
Source: Central Bureau of Health Intelligence	Period: ▪ March 2007	Frequency: Not Available	
Data available: Demographic replacement due to death – by state, age and sex		Data availability level:	
		National Level	√
		State Level	√
		District Level	NA
Data Gap			
<ol style="list-style-type: none"> 1. Time lag and regular update of demographic replacements due to death by State, Age, Sex and Occupation. 2. We observe that around 50% of the deaths are reported and registered in civil registration systems. 			

Sample data template

1. Distribution of Medically Certified Deaths by Cause

#	Cause of Death	1998				1999			
		Male	Female	Total	%age	Male	Female	Total	%age
1	Neoplasm	9373	6415	15788	3.17	10232	7226	17458	3.5
2	Mental and Behavioral Disorders	477	98	575	0.12	466	114	580	0.1
3	Disease of ear and mastoid process	52	26	78	0.02	26	16	42	0

2. Distribution of Medically Certified Deaths by Age and Sex

#	Age in Years	Medically Certified Deaths					
		Male		Female		Combined	
		Number	%age	Number	%age	Number	%age
1	Less than 1	37360	11.71	24138	12.61	61498	12.04
2	1 to 4	6859	2.15	5366	2.8	12225	2.39
3	5 to 14	8256	2.59	6556	3.43	14812	2.9

Demographic replacement due to sickness is not readily available in public domain. However, the same can be sourced from insurance companies.

Demographic Replacement due to retirement

Demographic replacement due to retirement can be deduced using combination of census data and employment and unemployment data of NSSO.

Data Element 5: Emerging new investments and company registrations

Data Element 5A: Emerging new investments

Information on the emerging new investments is available at the state level in the respective State's Department of Industries and Commerce website. This section provides sample of information available in the Gujarat and Karnataka State websites.

	outflow);							placement agencies involved in overseas employment <ul style="list-style-type: none"> ▪ Lack of regular updation and linkage with overseas employees
4.	Identify sources and provide samples of data on the annual local demand for skilled and semi-skilled workers and technicians due to: <ul style="list-style-type: none"> ○ Demographic replacement needs (due to sickness, death, retirements, etc.); ○ Labour turnover when exiting skilled workers are changing their occupational profiles through skills retraining to accept different jobs 	Multiple sources	No regular update	Yes	Yes	No	Low	<ul style="list-style-type: none"> ▪ Time lag and regular update of demographic replacements due to death by State, Age, Sex and Occupation. ▪ We observe that only 50% of the deaths are reported and registered in civil registration systems.
5.	Identify sources and produce samples of data available on the average demand for skilled and educated workforce for the new jobs created annually (emerging from new investments, company registrations, etc.) in both the organised and unorganised economies	Department of Industries	Annual	Yes	Yes	No	Medium	<ul style="list-style-type: none"> ▪ Data available with leading industrialised states ▪ Disconnect in aggregation of national and state level data
6.	Identify other sources and produce samples of other data used to forecast the demand for skills in different economic sectors	Ministry of Finance, National Accounts, Census	Annual and Quarterly	Yes	Yes	No	Medium	<ul style="list-style-type: none"> ▪ Lack of uniform/standardised forecasting methodology ▪ Multiple forecasting data ▪ Lack of base data for informal sector

Recommendations

To improve the availability of skill development data, we propose a set of interventions:

1. Develop a more integrated institutional framework to align various stakeholders (public and private) in data collection and aggregation at district, state and national level
2. Agree on key data sets to be collected nationally
3. Develop common template for data collection and aggregation to avoid duplication
4. Align occupational standards vis-a-vis the existing occupations in industries vis-a-vis supply of human resources through formal and informal TVET system
5. Develop robust IT infrastructure at grass-root level to reduce time-lag in data collection and aggregation
6. Make UID mandatory at the school level for capturing and tracking of human resources getting into formal and informal system.
7. Map details of dropouts enrolling for TVET and other skill should be captured through UID system
8. Develop district wise and school wise enrolment and pass rates as part of centralised database (Refer Annexure 1)
9. Map district wise, State wise, Discipline wise enrolment, progression and graduation rates for Universities (Refer Annexure 2) (including Open Universities) and colleges should be made available in the public domain in real time.
10. Develop centralised database available for ITIs and ITCs for enrolments, pass and dropout rate and placement data.
11. Develop centralised database for employers sponsored vocational training programs under their Corporate Social Responsibility (CSR) initiatives
12. Aggregate data on skilled and educated workforce moving to / returning from overseas and trade wise should be made real time through MOIA (Refer Annexure 3)
13. Aggregation of demand related data at association or sector skill council level
14. Develop standardised methodology for forecasting of human resources at sector level encompassing district, state and national level
